adaptive protection

The Wowrack Difference

Broad Visibility

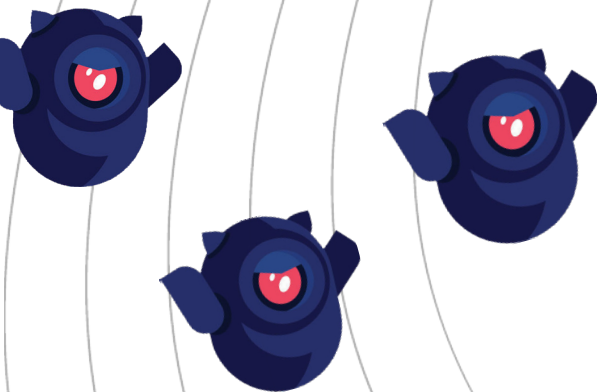

The Concierge Security Team investigates and triages incidents by analyzing security telemetry gathered from both internal and external networks, endpoints, and cloud environments. This data is enriched with various threat feeds, OSINT information, CVE details, ATO data, and more to provide a comprehensive view and context to each incident. As a result, the team can provide detailed and nuanced insights into each incident, thanks to the granular visibility provided by this process.

Customer Portal & Insights

The specially designed graphical user interface (GUI) allows users to interact with their Concierge Security Team (CST), view their security score, and access important information. Additionally, the GUI provides visibility into any open tickets, enabling users to stay up-to-date on their security incidents and receive real-time updates on their progress.

Endpoint Threat Detection & Response

our security solution offers enhanced threat detection capabilities and endpoint intelligence that allow our engineers to gain deep insights into your security posture. Additionally, our X Sysmon event monitoring provides east/west visibility, enabling us to detect and track lateral movement of threats. Our service also includes weekly endpoint reporting to provide you with a detailed overview of your security status. Finally, we provide managed containment to ensure that any detected threats are immediately contained and neutralized.

| More Than an MSSP

Wowrack is more than your average Managed Security provider. Meaning, we offer a range of services including; Managed Services (MSP), Managed Backup, Infrastructure As A Service (IaaS), and many more!

For over 20 years, we have been the one-stop shop that takes care of all of your information infrastructure needs. Scale and customize to your liking as your company grows. We offer colocation services throughout Asia, Europe and the United States including Jakarta IN, Surabaya IN, Amsterdam NL, Seattle WA, Dallas TX, Buffalo NY, and more.

About

Wowrack (Wow Technologies, Inc.) is a multinational IT company that provides various cloud infrastructure, backup and disaster recovery, colocation, and cybersecurity solutions.

Ever since 2001, we have always been striving to be more than a service provider—a partner. Dollars and cents might be an integral part of running a business, but we value relationships with our customers over anything. In delivering our products and services to cater your needs, there is one thing that we always keep in mind: we must deliver what your business actually needs. Not too much, not too little. Just the right amount.
